

Android Test Task 1:

1. Design a Login page with Email & Password using material guidelines. [NO API, using predefined username: test@android.com, 123456]
2. When user logged in ,

Listing will be called using : https://api.exchangeratesapi.io/history?start_at=2018-01-01&end_at=2018-09-01&base=USD

Listing UI will be Look alike:

List item:

Date: **DD/MMM/YYYY**

BGN 1.56	CAD 1.242131313131	BRL 3.41313131313	HUF 252.3122213	DKK 1.132313
DKK 1.132313	DKK 1.132313	DKK 1.132313	DKK 1.132313	DKK 1.132313
DKK 1.132313	DKK 1.132313	DKK 1.132313	DKK 1.132313	DKK 1.132313

Android Test Task 2:

1. Create Grid of 3x3

1	2	3
4	5	6
7	8	9

Now make each and every item to be drag-able,

Constraints:

1. Every item can be drag-able, and it can be re-positioned
2. Now if I am moving Number 9 with Number 1, it should be like

9	2	3
4	5	6
7	8	1

3. There should be Reset Button to re-positioned all item and it should be same as first table.
